“Save Birds, Feed Birds, Love Birds”

Report, Photograph, Evidence of Success

Nature has abundance in store for every creature in this world. All the living beings have calculated share over the natural resources. One living organism is dependent on other and this cycle goes on. All the animals, birds, insects, aquatic creatures have special role to play in the eco-system of nature. This helps building our eco-system very strong. Their individual presence itself paves ways for others to grow while maintaining healthy environment.

Even mankind is not different. Before the recent development humans had been living their life in tune with nature. But due to the excessive greed and ardent selfish desire to make development at the cost of nature has amplified lot of complications for the nature.

In order to make life more comfortable humans have created concrete jungle and high-class infrastructure. But in this process mankind blindly started using the natural resources. Excessive usage of natural resources has casted adverse effect on nature. Earlier birds in general used to make their nests in the unused space under the roof. But the man has created high rise concrete buildings with no space for species like birds and hence these days we find no birds to nearby human beings habitats. Their absence has made adverse effect on eco-system.

Looking at the poor plight of the birds and being the environment cautious, special committee has been set up to look into this matter under the leadership of Hon’ble Principal Dr. Hanumant Lunge with following members:

1. Dr. Ashish D. Kale - Convener
2. Dr. Suvarna Jawanjal - Member
3. Dr. Ravindra Iche - Member
4. Ku. Mukta S. Nimbhorkar - Member

Program Report

Program name: - World Sparrow Day
Organiser: - Department of Social Science
Time (Venue) :- Time; 12.00pm.
Date:- 21st , March, 2022.
Program Speakers/ Lecturers/ Guest:- Mr. Vivek Chargan (Water Man)
President: - Dr. Hanumant Lunge
Total Participating Students: - 55
Participation :- B.A. Part 1, 2, 3 Students, by students

Purpose of the program :-

Celebrating World Sparrow Day in memory of Late. Indirabai Kadu and distributing water pots for birds is a great initiative to raise awareness about the conservation of sparrows and other urban birds. The event begins by honoring and remembering Late. Indirabai Kadu, and then includes an educational session on the importance of sparrows and their habitats. Water pot distribution is organized at various locations in the community, with the pots placed in shaded spots and regularly filled. Bird feeding is encouraged, and planting native trees and shrubs can provide nesting spaces and food sources for sparrows and other birds. Community involvement is encouraged, with local schools, community centers, and residents taking responsibility for maintaining the water pots and bird-feeding stations. Art and craft activities, awareness posters, and social media campaigns are also used to spread the message and encourage more people to join the cause. Documenting and following up on the event is crucial to document the event and ensure the water pots are regularly filled and maintained

Program in brief :-

By organizing this event, you are honoring Late. Indirabai Kadu's memory and contributing to the conservation of sparrows and other urban birds, inspiring others to take similar steps in their communities, creating a positive impact on bird populations and the environment.
